

Name _____

Heat Energy and Insulation

Which will cool most quickly? _____

My Insulator Experiment

My Observations

No Insulation

	Temperature Each 5 Minutes for Water and Air																		
	0	5	10																
W																			
A																			

Insulation

	Temperature Each 5 Minutes for Water and Air																		
	0	5	10																
W																			
A																			

My Conclusions

1. What effect did insulation have on keeping heat energy in your “building?” _____

2. What insulating materials were most effective? _____
